

## ASSURANCE ASSESSMENT SERVICES

**Ignyte— has been recognized as the industry leader for delivering expert security services for organizations of all sizes across the country. Ignyte Assurance Assessment Services provides the opportunity to supplement the Ignyte platform.**

### FRAMEWORK BASED ASSESSMENTS

Ignyte can perform maturity based assessments to evaluate an organization's cyber maturity and assist with developing a roadmap to improve on any weaknesses. Ignyte can also perform several readiness assessments such as PCI-DSS or FedRAMP. Ignyte can provide a certification and report on compliance after the assessment has been completed. Our most popular readiness assessments include:

- **NIST CSF**
- **NIST RMF**
- **FedRAMP**
- **FFIEC**
- **GDPR**
- **PCI-DSS**
- **ISO27000 Series**

### COMMON CONTROLS DEVELOPMENT

Ignyte can develop common controls which includes controls mapping services. If an organization has to be compliant with several regulations, Ignyte has the ability to map controls across multiple frameworks tailor it to the organizations control language.

### POLICY DEVELOPMENT

It is imperative that every organization have a robust set of policies in place from a legal, security and privacy perspective. Ignyte can provide Security and Privacy Policy Development Customization which includes policy and process documentation review.

### GDPR ASSESSMENTS

With the increased concerns on privacy and to the ability to identify critical data, where it resides or how long it is being retained for, GDPR is vital for organizations that currently operate within EU. Ignyte GDPR Data Protection Impact Assessment provide organizations with the ability to identify and reduce the data protection risks within projects and systems, as well as reduce the likelihood of privacy harms to data subjects.

### PCI-DSS READINESS ASSESSMENT

PCI-DSS is a set of security standards for merchants who accept, process, store or transmit credit card information. Ignyte's audit readiness assessments for PCI-DSS automates the management of the audit readiness assessment.

### FEDRAMP READINESS ASSESSMENT

Ignyte's expert security resources bring more than 10 years of experience in defense and working with these types of assessments. The Federal Risk and Authorization Management Program (FedRAMP) is a government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. Any organizations moving systems/applications to a cloud service provider (CSP) like AWS, those application/systems need to go through a very complex assessment like FedRAMP. Ignyte will assist with FedRAMP PMO Management, 3PAO conflict management, System Security Plan (SSP) and artifact development.
