

VIRTUAL CISO SERVICES

Ignyte— has been recognized as the industry leader for delivering expert security services for organizations of all sizes across the country. Ignyte Assurance Assessment Services provides the opportunity to supplement the Ignyte platform.

SECURITY PROGRAM DEVELOPMENT

Ignyte will take a holistic risk and cost balanced approach to developing a security program. Our assurance programs are designed to support the CISO and the CIO. Assurance program delivery can be a combination of services and the platform. By conducting a framework assessment, we will start with defining your cyber risk appetite and developing a Corporate Wide Security Governance Strategy. Our framework specialties include the following:

- **NIST CSF**
- **NIST RMF**
- **FedRAMP**
- **FFIEC**
- **GDPR**
- **PCI-DSS**
- **ISO27000 Series**
- **And many more**

SECURITY EXECUTIVE SERVICES

Ignyte will provide Executive Security Services that includes developing a Corporate Governance Strategy and how to manage multidimensional risks. We provide Board of Director Representation and Management for all high level discussions in regards to cyber risk, governance and compliance strategy. Ignyte will assist with security leadership and coaching from the C-level executives to user level.

TEMPORARY CISO

We know that security officers are not only looking to manage the risk, but also provide assurance to their business. Ignyte will provide experience and subject matter expertise to ensure the organization has improved their overall security posture.

EDUCATION AND TRAINING DEVELOPMENT

The number one vulnerability within an organization is their people. Ignyte will create a customized cyber security course development from user level to executive level leadership and provide technical education ranging from secure configurations to high powered security executive training.

COST AND BUDGET DEVELOPMENT

Ignyte will sustain the cost of security and privacy. Throughout this process Ignyte will develop business and cost justification for any business needs for cyber security. Ignyte will perform a quantitative analysis on a correct Return on Investment calculation for the organization. As the project matures, Ignyte will continuously develop the security budget.

REQUIREMENTS AND RFP DEVELOPMENT

Ignyte will formalize a robust security procurement strategy for when the organization is looking to obtain tools, services or people to improve their security posture. As the organization looks to procure more tools, Ignyte will provide Evaluation Criteria and RFP Development, Bid Management and Security Sourcing for these scenarios.
